## PROJECTS

**Black Friday Sales Analysis.** This project involved analyzing large-scale Black Friday sales data to understand customer demographics and purchasing behavior. I cleaned and transformed the dataset to extract key insights based on variables like age, gender, occupation, and product categories. Visualizations such as bar charts, pie charts, and heatmaps were created using Seaborn and Matplotlib to support data-driven marketing decisions.

**Personal Portfolio Website.** Created a personal website to showcase my skills, experiences, and interests, designed to be visually appealing and easy to navigate. Built entirely with HTML and CSS (without JavaScript), focusing on clean structure, responsive design, and accessibility.
